Work Experiences

Self-study

Present

Self-study and learning web technologies to create cool web app's

Frontend developer, at SlothsCommand 2023

Fullstack app for the game developer, including interaction with the game database and the ability to download the game

Practice, at QuartSoft 2021 - Past time

I did an internship in the IT-company QuartSoft in Kramatorsk, my task was to make a layout of the sites

About Me

Hi, im Vladislav, like to see you here. I love programming and creating visually beautiful and fast web app's using React. In the future i also intend to delve a bit deeper into Express, MongoDB and other backend technologies.

I started learning to develop web app's about two years ago. At first it was a hobby, but over time it turned into a passion. I especially love the functional and reactive approaches that React and Next JS offer.

What I appreciate most is the ability to create interfaces that are easy to use and have a clear design. I like solving problems efficiently using small, clear components.

Now im looking for a cool and positive company with interestin projects and ideas.
